9			
10	SOCIAL POSITIONING INPUT SYSTEMS, LLC,	CASE NO. 3:22-cv-00221	
11	Plaintiff,	PATENT CASE	
12		JURY TRIAL DEMANDED	
13	v.		
14	KEEP TRUCKIN, INC.,	COMPLAINT	
15	Defendant.		
16			
17	Plaintiff Social Positioning Input Systems, LLC ("Plaintiff" or "SPIS") files		
18	this Complaint against Keep Truckin, Inc. ("Defendant" or "Keep Truckin") for		
19	infringement of United States Patent No. 9,261,365 (hereinafter "the '365 Patent").		
20	PARTIES AND JURISDICTION		
21	1. This is an action for patent infringement under Title 35 of the United		
22	States Code. Plaintiff is seeking injunctive relief as well as damages.		
2324	2. Jurisdiction is proper in this Court pursuant to 28 U.S.C. §§ 1331		
25	(Federal Question) and 1338(a) (Patents) because this is a civil action for patent		
26	infringement arising under the United States patent statutes.		
27	3. Plaintiff is a Wyoming limited liability company with an address of 1		
28	East Broward Boulevard, Suite 700, Ft. Lau	uderdale, FL 33301.

- 4. On information and belief, Defendant is a Delaware corporation with its principal office located at 55 Hawthorne St 4th Floor San Francisco, California 94105. On information and belief, Defendant may be served through its agent, Corporation Service Company, 251 Little Falls Drive, Wilmington, DE 19808.
- 5. On information and belief, this Court has personal jurisdiction over Defendant because Defendant has committed, and continues to commit, acts of infringement in this District, has conducted business in this District, and/or has engaged in continuous and systematic activities in this District.
- On information and belief, Defendant's instrumentalities that are alleged herein to infringe were and continue to be used, imported, offered for sale, and/or sold in this District.

VENUE

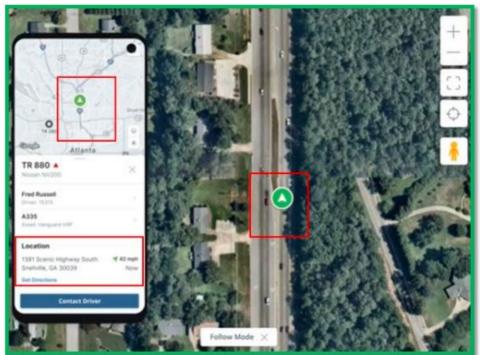

7. On information and belief, venue is proper in this District under 28 U.S.C. § 1400(b) because Defendant is deemed to reside in this District. Alternatively, acts of infringement are occurring in this District and Defendant has a regular and established place of business in this District.

COUNT I

(INFRINGEMENT OF UNITED STATES PATENT NO. 9,261,365)

- Plaintiff incorporates paragraphs 1 through 7 herein by reference. 8.
- This cause of action arises under the patent laws of the United States 9. and, in particular, under 35 U.S.C. §§ 271, et seq.
- Plaintiff is the owner by assignment of the '365 Patent with sole rights 10. to enforce the '365 Patent and sue infringers.
- A copy of the '365 Patent, titled "Device, System and Method for 11. Remotely Entering, Storing and Sharing Addresses for a Positional Information Device," is attached hereto as Exhibit A.
- 12. The '365 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

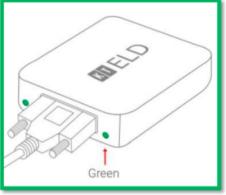

- 13. Upon information and belief, Defendant has infringed and continues to infringe one or more claims, including at least Claim 1, of the '365 Patent by making, using (at least by having its employees, or someone under Defendant's control, test the accused Product), importing, selling, and/or offering for sale associated hardware and software for asset locating services (e.g., Keep Truckin asset tracking platform, and any associated hardware, apps, or other software) ("Product") covered by at least Claim 1 of the '365 Patent. Defendant has infringed and continues to infringe the '365 patent either directly or through acts of contributory infringement or inducement in violation of 35 U.S.C. § 271.
- 14. The Product provides an asset tracking system for real-time GPS tracking of assets. A user can receive location information on a positional information device (e.g., mobile device or computer). Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

15. The Product software sends a request from a first (requesting) positional information device (e.g., mobile device or desktop with software installed) to a server. The request is for the real-time location (e.g., stored address) of an asset, and includes a first identifier of the requesting positional information device (e.g., user ID and password for the Product software used in the particular enterprise). The request is sent to the Product server for transmitting the asset location. The server receives the at least one address from a second (sending) positional information device at the asset (e.g., employee mobile phone). Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

1 GPS tracking systems mainly function by using the Global Navigation Satellite System (GNSS) network. 2 3 The satellites within the network emit microwave signals to different GPS devices, 4 including those found in smartphones and vehicles, and relay data such as a vehicle's direction, speed, location, and more. 5 6 The four components that make vehicle communication technology and GPS truck 7 trucking work are: 8 1. The GPS satellite 2. The vehicle equipped with a GPS tracking device 9 3. A wireless network 10 4. GPS servers 11 Source: https://keeptruckin.com/glossary/what-is-gps-tracking 12 13 A GPS tracking device is installed into a piece of equipment, trailer, or vehicle to record and store necessary information. It then uses GPS 14 satellites to pinpoint the location of the vehicle or trailer in real-time. 15 The data stored within the GPS tracking device is then transmitted 16 through a cellular or wireless network to a server. The server works like 17 cloud storage that lets you access the information regardless of your location and the device you use (smartphone, tablets, computer, etc.). 18 Source: https://keeptruckin.com/glossary/what-is-gps-tracking 19 20 KEEP T R U C K I N 21 Log in to your account 22 23 Email or Username 24 25 26 Source: https://keeptruckin.com/log-in 27

16. The at least one address is received from the server at the requesting positional information device. For example, the Product's server transmits the position of an asset (at least one address) to the requesting positional information device. Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

GPS tracking systems mainly function by using the Global Navigation Satellite System (GNSS) network.

The satellites within the network emit microwave signals to different GPS devices, including those found in smartphones and vehicles, and relay data such as a vehicle's direction, speed, location, and more.

The four components that make vehicle communication technology and GPS truck trucking work are:

- 1. The GPS satellite
- 2. The vehicle equipped with a GPS tracking device
- 3. A wireless network
- 4. GPS servers

A GPS tracking device is installed into a piece of equipment, trailer, or vehicle to record and store necessary information. It then uses GPS satellites to pinpoint the location of the vehicle or trailer in real-time.

The data stored within the GPS tracking device is then transmitted through a cellular or wireless network to a server. The server works like cloud storage that lets you access the information regardless of your location and the device you use (smartphone, tablets, computer, etc.).

Source: https://keeptruckin.com/glossary/what-is-gps-tracking

17. A second identifier for the second (sending) positional information device is determined based on the first identifier and the server retrieves the at least one address stored in the at least one sending positional information device. The Product application installed on the requesting positional information device requests (from the server) the asset's GPS location (i.e., at least one stored address stored). As shown above, before activating the tracker (i.e., the sending positional information device), a unique tracking device's ID number or credentials (i.e., second identifier) needs to be added to the user's account identified by the user login ID and password (i.e., the first identifier). Hence, the tracker device's ID number or asset credentials (i.e., second identifier) is mapped to the user's login ID (i.e., the first identifier) for tracking the real-time location (i.e., at least one stored address stored) of the asset. Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

Q

1	18. Defendant's actions complained of herein will continue	unless	
2	Defendant is enjoined by this court.		
3	19. Defendant's actions complained of herein are causing irreparable	harm	
4	and monetary damage to Plaintiff and will continue to do so unless and until		
5	Defendant is enjoined and restrained by this Court.		
6	20. Plaintiff is in compliance with 35 U.S.C. § 287.		
7	JURY DEMAND		
8	21. Under Rule 38(b) of the Federal Rules of Civil Procedure,	Plaintiff	
9	respectfully requests a trial by jury on all issues so triable.		
10	PRAYER FOR RELIEF		
11	WHEREFORE, Plaintiff asks the Court to:		
12	(a) Enter judgment for Plaintiff on this Complaint on all causes of	action	
13	asserted herein;		
14	(b) Enter an Order enjoining Defendant, its agents, officers, s	ervants,	
15	employees, attorneys, and all persons in active concert or participation with Defendant		
16	who receive notice of the order from further infringement of United States Patent No.		
17	9,261,365 (or, in the alternative, awarding Plaintiff a running royalty from the time of		
18	judgment going forward);		
19	(c) Award Plaintiff damages resulting from Defendant's infringe	ment in	
20	accordance with 35 U.S.C. § 284;		
21	(d) Award Plaintiff pre-judgment and post-judgment interest and cost	s; and	
22	(e) Award Plaintiff such further relief to which the Court finds Pl	aintiff	
23	entitled under law or equity.		
24	Dated: January 12, 2022 Respectfully submitted,		
25	/s/ Stephen M. Lobbin
